

Equipment

Masking tape

Cutter

Vinyl Squeegee

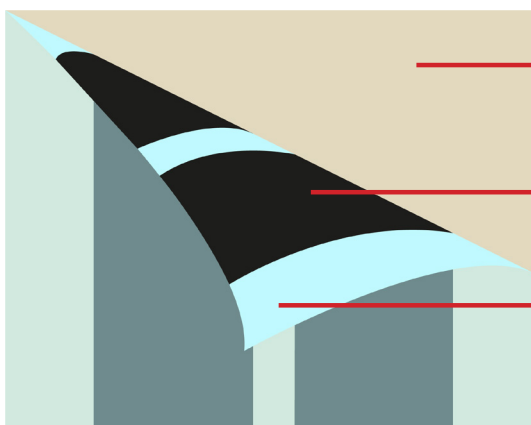

Water spray

Instructions

1. Remove any items that could interfere with installation such as jets and wipers.
2. Clean the surface with cleaning product (household vinegar, alcohol, etc.) to degrease your bodywork.
3. Prepare a water + washing-up liquid solution (1 drop for 20cl of water) in a spray.
4. Remove the Liner from your adhesive (see illustration below). You will then discover the sticky part of the adhesive.

The Liner : opaque film to be removed first

The adhesive : this side is the sticky part

The transfer film : transparent film to be removed last

5. Spray the sticky part of your stickers with the water + washing-up liquid solution.
6. Likewise spray your bonnet.
